

My Dream computer build

1.CPU

I think i will choose **Core i9-13K** it is from the most powerful CPU
It is **5.80 GHz** , it is **24 cores and 32 threads**
And it is Processor Power : **125 W**
And it can turbo boost it take power :**253 W**
And i think it is compatible for all uses

2.Motherboard

I think I will choose **GIGABYTE B760** from my sight It is good.
And it supports
14th,13th,12th gen. Takes 4
ram slots.
And 1*m.2 and 2*harddisk

3.GPU

I think i will choose **GIGABYTE RTX 4090** it is so **over kill**
And I chose it because it matches our CPU . It supports **Nvidia reflex**
And it supports **RAY Tracking**. It is so professional in gaming and graphics and video editing like premiere.

4.case

I will choose **ATX Mid Tower** it is a good case modern
It has a high air flow . And it includes two fans .and a good

Cable management .
